Request to Withdraw a Holding of Abandonment under 37 CFR 1.181

Applicant respectfully requests the holding of abandonment in the above referenced application be withdrawn. The Notice of Abandonment has a mailing date of April 18, 2008 and is enclosed herewith as Exhibit A.

Applicant filed his application on February 24, 2004. Applicant's attorney received an office action subjecting claims 1-16 of the application to a restriction and/or election requirement. The mailing date of the office action was October 9, 2007. The office action provided a 1 month or 30 day (whichever is longer) shortened statutory period for reply. A copy of the office action is enclosed herewith as Exhibit B.

Applicant responded by electing invention I covered by claims 13-16 with an office action response dated November 8, 2007. The response included a certificate of mailing dated November 8, 2007. Attorney for applicant, Robert O. Blinn, hereby states he personally remembers signing and mailing the office action response to the US Patent and Trademark Office on Thursday, November 8, 2007. A copy of the response is enclosed herewith as Exhibit C.

Applicant further submits herewith a copy of the return receipt postcard mailed with the above referenced office action response. This copy of the return receipt postcard is enclosed herewith as Exhibit D. This return receipt postcard indicates the United States Patent and Trademark Office received the office action response on Tuesday, November 13, 2007. Accordingly, Exhibit D hereto, provides proof the United States Patent and Trademark Office received the office action response.

Accordingly, applicant requests the office action response, enclosed as Exhibit C, be allowed as timely filed and the holding of abandonment be reversed.

Respectfully Submitted,

Robert O. Blinn

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 13-16, drawn to a method for removing hydrogen sulfide, classified in class 423, subclass 230.

II. Claims 1-12, drawn to an apparatus for removing hydrogen sulfide, classified in class 422, subclass 168+.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed could be used to perform a materially different process, such as a process for treatment of halogens, NO_x, or SO_x. The process could also be performed by a materially different apparatus, such as an apparatus comprising specific means for sequential reaction or injection.

Application/Control Number: 10/786,715
Art Unit: 1754

Page 3

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, and because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

3. A telephone call was made to Robert Blinn on 9/25/07 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit

Art Unit: 1754

evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward M. Johnson whose telephone number is 571-272-1352. The examiner can normally be reached on M-F 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley S. Silverman can be reached on 571-272-1358. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
